## Citrus Canker Management

USDA National Institute of Food and Agriculture U.S. DEPARTMENT OF AGRICULTURE

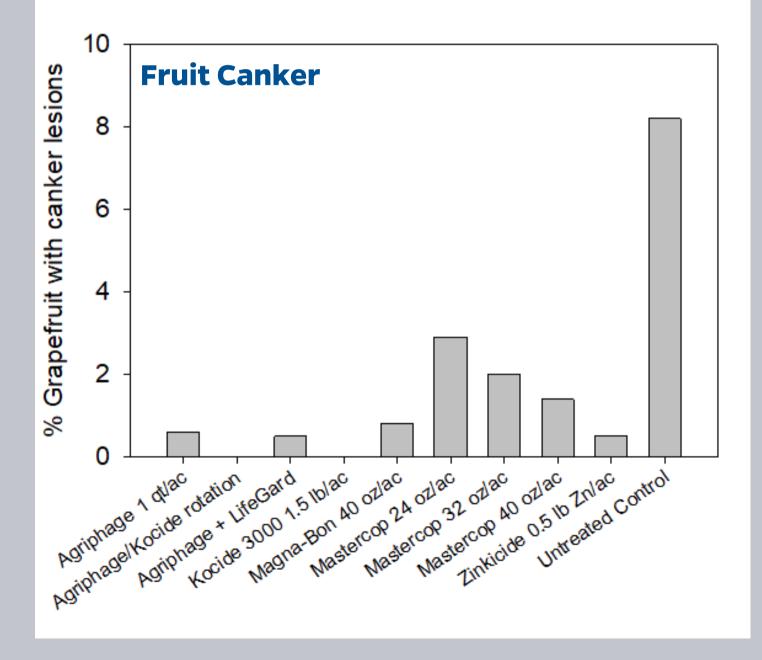

For more information, please contact Evan Johnson, egjohnson@ufl.edu

### **Citrus Canker Management**

- All products applied at 21 day interval March to October
- Insoluble copper consistently reduces canker
- Agriphage performs as well as copper under mild/moderate canker pressure
- Soluble copper needs to be used at the maximum labelled rate for best canker prevention

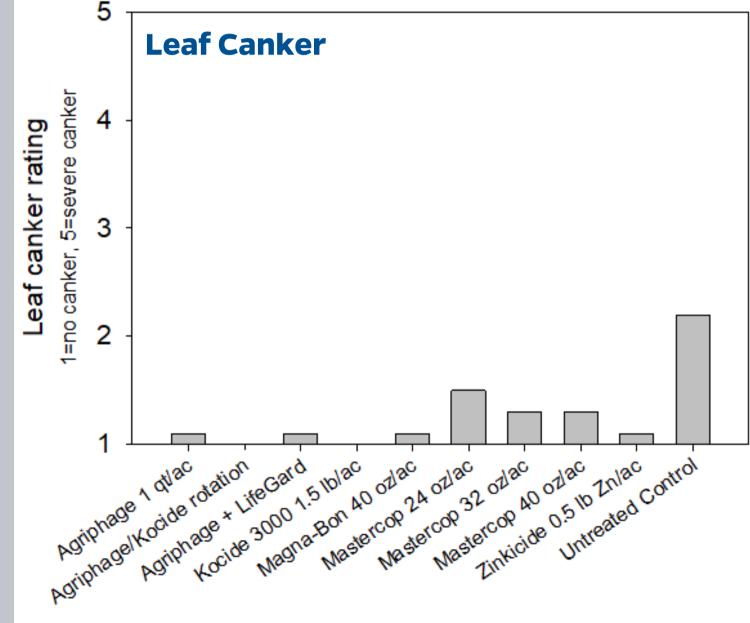

### **Citrus Canker Management**

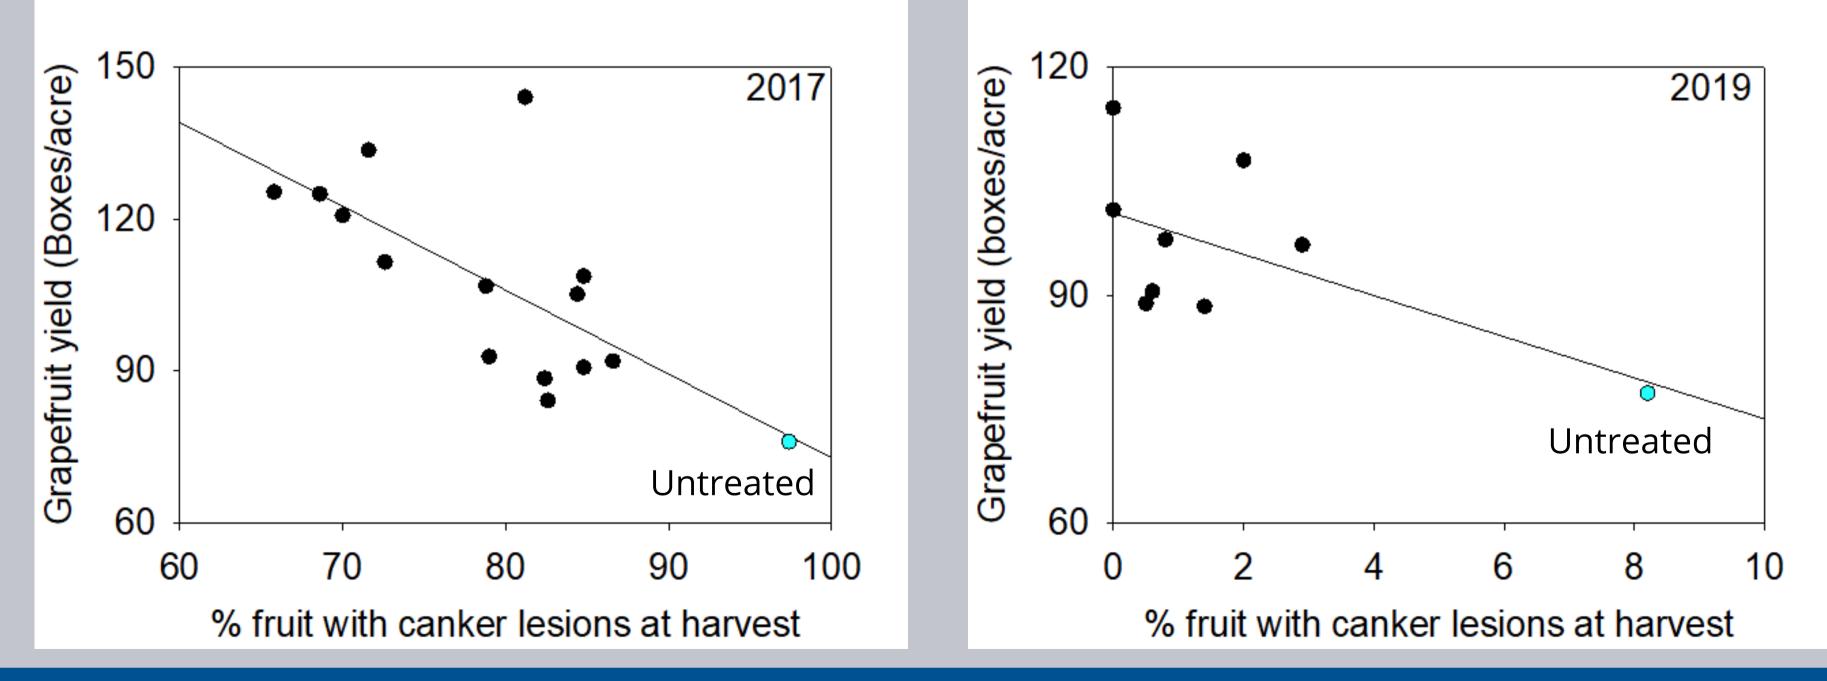

- 21 day schedule focused on protecting fruit
- Also reduces inoculum build-up on leaves

Managing citrus canker improves yield by reducing fruit drop and improving fresh fruit packout
