# [1] What are the Best Pomegranates: Update from the Field

## [2] *Website Changes*

Bill Castle  
*UF Professor Emeritus*  
*Horticulture*  
*Citrus Research and Education Center*  
*Lake Alfred*  
[bcastle@ufl.edu](mailto:bcastle@ufl.edu)

3.3 lbs !

# *Lessons from the Field*

- Most observations taken from the cooperators with larger-sized plantings, i.e., > 10 plants.
- Rated flowering, tree size and condition.
- Lacking good yield information.
- Yield related to environment and plant care.
- Tree growth, condition and flowering VERY related to tree care.
- Growing poms must be taken seriously especially regarding irrigation and fertilization.
- “Midget leaf.” Likely to be a micronutrient problem.
- Most ornamental selections doing poorly.

Combined Rating of Flowering, Canopy Appearance and Plant Height

# Al-Sirin-nar

# *Pom cultivars with merit:*

- AZADI
- DESERTNYI
- MEDOVYI VAHSHA
- SALAVATSKI
- *Girkanets*
- *Christina*
- *Al-sirin-nar*
- *Wonderful*

‘WONDERFUL’ plants produced by micropropagation and growing in a covered structure.

### Welcome to the Citrus Research & Education Center

For the past 90 years, the University of Florida (UF) Citrus Research and Education Center (CREC) has been honored to assist the citrus industry in meeting its developmental needs through its Research, Extension, and Teaching programs. CREC is the oldest and largest off-campus experiment station in UF's Institute of Food and Agricultural Sciences (UF/IFAS) and is unique among research centers in that it focuses entirely on one commodity, citrus.

CREC discovers and delivers innovative solutions that empower citrus and other agricultural interests to conduct responsible and profitable business. CREC fosters scientific excellence and efficient use of resources.
