

Pine

Fig. 1. A 10-year-old slash pine windbreak near Lake Alfred, Florida consisting of two offset rows with trees planted 5 feet apart in the row and with 3 feet between rows.

Fig. 2. The edge of a 10-acre sand pine block planted at the Water Conserv II site near Winter Garden. The age of the trees is uncertain but is at least 10 years.

Fig. 3. Mature slash pine trees along Highway 62 near Duette, Florida. Note that some trees were growing underneath utility lines and were being topped periodically.

Fig. 4. Slash pines trees planted as a windbreak for citrus being grown at the UF Horticulture Farm near Fifield Hall, Gainesville.
