Solutions for Your Life

Pine / Red Cedar

Fig. 1. A windbreak planted in 1990 near Dundee, Florida. There are two offset rows planted 5 feet apart of red cedar trees planted 5 feet apart. Adjacent to the cedar trees is one row of slash pine trees planted 10 feet from the cedars and 10 feet apart in the row. The pines are 25 feet from the citrus trees.

Fig. 2. A windbreak combination of mature sand pine and red cedar trees planted around a citrus grove in central Florida near Haines City.
