

Summary of 2010-2011 Citrus Budget for the Indian River Production Region

Ronald P. Muraro, Extension Economist
University of Florida, IFAS, CREC, Lake Alfred, FL

Citrus budgets are tabulated annually for the Central, Southwest and Indian River citrus production regions of Florida. The attached budget costs are for the Indian River citrus production region. These costs may not represent your particular grove situation. However, they represent the most current comparative cost estimates for Florida citrus. The budget costs items for the **Indian River** represent a **custom managed operation**.

Budget analysis provides the basis for many grower decisions. Budgets can be used to calculate potential profits, determine cash requirements and determine break-even prices. The budget costs presented will serve as a format for growers to analyze their own individual records. The cost data were developed by surveying custom operators, suppliers, growers, colleagues with UF/IFAS and County Extension Agents in each production region.

Although there were changes in the prices of fertilizer (25% increase) and chemical (2% decrease) inputs and application costs (2% increase), there were no significant changes in total average cultural production costs per acre between 2009-2010 and 2010-2011. Growers have increased their focus on controlling the Asian citrus psyllid that transmits HLB-greening disease incorporating more aerial and low-volume ground spray applications to reduce total spray costs.

The 2010-2011 comparative budget summary for processed oranges in Indian River Florida is shown in Table 1. The estimated costs represent a traditional citrus canker and HLB-greening management program. The budget shows the total cost per acre Without and With resetting-tree replacement.

With the introduction of citrus greening in 2005, Florida citrus growers have had to develop new management strategies such as to identify and remove infected trees along with adding new spray programs to control the insect vector, the Asian citrus psyllid. During the past couple of years, many growers have decided not to remove HLB symptomatic trees and have begun adding a foliar nutritional formulation to their air-blast ground spray applications. Likewise, with the end of the citrus canker eradication program in 2006, to reduce the impact of canker infestations on new tree flushes and reduce fruit drop, copper spray material is being added with each spray tank mix. For fruit grown for the fresh fruit market, additional costs are incurred by growers to assure that the blocks and fruit can be certified “canker free” for shipments to the U.S. domestic and European markets. Additional costs required to manage citrus greening and canker were based on the cultural programs being implemented in UF/IFAS CREC research groves and information from citrus growers. These costs were incorporated into Tables 1, 2 and 3.

The budgets shown in Table 1 lists the costs of individual grove care practices normally performed in a citrus grove. These costs reflect current grove practices being performed by growers. The estimated costs are for a mature grove (10+ years old); the grove care costs for a specific grove site may differ depending

upon the tree age, tree density and the actual grove practices performed. For example, tree losses due to blight, tristeza or citrus greening could double, if not increase more, the tree replacement costs. Travel and set-up costs may vary due to the size of a citrus grove and the distance from the grove equipment barn. Citrus canker and greening control costs will also vary between individual blocks due to variety and fresh or processed market destination.

The comparative budget costs without resetting/tree replacement are shown as an expanded “**delivered-in**” format in Table 2. The delivered-in costs include cultural/production, management, regulatory and harvesting costs. The costs are presented in per acre, per box and per packed carton cost units. The per acre yields used in Tables 2 and 3 represent above average production for grapefruit in the Indian River production region. The decreased yield per acre for the “with greening” expanded budget reflects an additional 2.3% average annual tree loss for all age trees. Table 3 shows the delivered-in costs with resetting.

In previous citrus budgets, the traditional citrus psyllid-greening management has included a soil-applied Temik treatment in January along with five ground spray applications. With the use of Temik discontinued, the 2010-11 spray programs (refer to Table 1) include a total of thirteen applications; 125 GPA ground sprays, ultra low-volume ground sprays and aerial sprays. Also, the spray and material costs for citrus black spot (CBS) control would add at least \$83.48 per acre.

Break-even prices for fresh market grapefruit are shown in Table 5 for yields ranging from 350 to 650 boxes per acre. With **no resetting**, the delivered-in break-even process ranged from \$1.941 to \$1.277 per pound solids and from \$9.71 to \$6.39 per box. With **resetting**, break-even prices ranged from \$2.721 to \$1.697 per pound solids and from \$13.61 to \$8.48 per box.

In Table 6, the total estimated F.O.B. costs for fresh packed grapefruit are shown. The F.O.B. costs are presented for “fresh fruit packout percentage rates” ranging from 25% to 100%.

The three ADDENDA tables provide the detailed information on the herbicide, spray and fertilizer programs used in the comparative budgets.

Additional information on budgeting and cost analysis can be obtained by contacting the author, your County Extension Citrus Agent, or going to the Lake Alfred UF/IFAS CREC **Extension-Economics** website: <http://www.crec.ifas.ufl.edu/extension/economics>.

Table 1. A Listing of Estimated Comparative **Indian River** Production Costs Per Acre for **Fresh Market Grapefruit**, 2010-2011^z

Costs represent a mature (10+ years old) Indian River White Grapefruit Grove.	Fresh Market Cultural Program	
	With Canker-Greening	
PRODUCTION/CULTURAL COSTS^y		
Weed Management/Control:		
Mechanical Mow Middles (3 times per year)	\$ 32.64	
Chemical Mow Middles (3 times per year)	18.12	
General Grove Work (2 labor hours per acre)	32.64	
Herbicide (1/2 tree acre treated): (See Supplemental Table 1 - Herbicide Programs #1, #2 and #3)	<u>136.47</u>	
Total Weed Management Costs		219.87
Spray/Pest Management: (See Supplemental Table 3)		
With Greening: Spray Programs #1, #2 @ 4, #3, #4, #5, #6, #7, #8, #9 & #10		844.81
Fertilizer (Bulk): 4 Applications (See Supplemental Table 2 - Fert Prog #4; 16-2-16-3MgO @ 160 lbs N)		292.68
Dolomite (one ton applied every 3 years) (Material/Application)		17.35
Pruning^x: Topping (\$26.83/A ÷ 2 yrs)	13.42	
Hedging (\$25.75/A ÷ 2 yrs)	12.88	
Chop/Mow Brush after Hedging (\$15.24/A ÷ 2 yrs)	7.72	
Raise Skirts of Trees (\$23.43/A ÷ 2 yrs)	<u>11.72</u>	
Total Pruning Cost		45.74
Irrigation: Microsprinkler System ^w	173.17	
Clean Ditches (Weed Control)	17.24	
Ditch and Canal Maintenance	16.23	
Water Control (Pump water in/out of Ditches and Canals)	<u>15.63</u>	
Total Irrigation Cost		222.27
Field Inspections for Citrus Greening (4 inspections @ \$27.41)		109.64
Clean Blocks Before Certification and Harvesting		35.15
Inspections Before "Canker Free" Certification (2 inspections @ \$26.90)		53.80
Mandatory Citrus Canker Decontamination Costs		<u>31.77</u>
TOTAL PROCESSED PRODUCTION COSTS WITHOUT		<u>1,873.08</u>
TREE REPLACEMENT-RESET COSTS		
Tree Replacement – 1 thru 3 years of age (7 trees/acre with greening)		
Remove Trees: Pull, Stack & Burn (Clip-Shear & Front End Loader)	41.23	
Prepare Site and Plant Tree (includes reset trees)	96.67	
Supplemental Fertilizer, Sprays, Sprout, etc. (Trees 1-3 years old)	<u>136.43</u>	
Total Tree Replacement Cost		<u>274.33</u>
TOTAL FRESH MARKET PRODUCTION COSTS WITH		<u>2,147.41</u>
TREE REPLACEMENT-RESET COSTS

Footnotes Refer to Table 1.

^yIndian River production area refers to the citrus producing counties on Florida's east coast.

Where **equipment use** or **application** is listed (discing, hedging, spray application, etc.), an **average custom charge** (cost) is used which includes a charge for equipment repairs, maintenance, labor and overhead management charges/costs. A **management charge** for equipment supervision and fruit marketing is not included. Management charges/costs could be based on a monthly charge (\$3 to \$6/acre) or percentage of gross sales. In addition to these charges, a harvesting supervision cost (10¢ to 20¢/box) for overseeing and coordinating harvesting may be charged. Other cost items which are not included in the budget are ad valorem taxes and interest on grove investment. In addition to these cost items, overhead and administrative costs, such as water drainage/district taxes, crop insurance, and other grower assessments, can add up to 12% to the total grove care costs. These costs vary from grove to grove depending on age, location, and time of purchase or establishment and are estimated in the expanded Tables 2 and 3.

Included in the materials expense is a supervision (or handling) charge of 10% of cost/price of the materials.

The budget cost items have been revised to reflect current grove practices being used by growers—e.g., chemical mowing, different spray materials, and rates of fertilization, microsprinkler irrigation, more reset trees, hedging and topping practices, etc. Therefore, the revised costs for each grove practice shown may be higher, or lower, than previously reported.

Although the estimated annual per acre grove costs listed are representative for a mature citrus grove (10+ years old), the grove care costs for a specific grove site may differ depending upon the tree age, tree density and the grove practices performed; e.g., spot herbicide for grass/brush regrowth under trees could add an additional \$19.98 per acre; extensive tree loss due to blight, tristeza, or citrus greening could substantially increase the tree replacement and care costs; travel and set-up costs may vary due to size of the citrus grove and distance from grove equipment barn and could add \$40.05 per acre; etc.

^xPer acre costs shown in parenthesis are for 2011.

^wIrrigation Expense includes the following:

	<u>Microsprinkler</u>	<u>Drip</u>
Variable Operating Expense (Diesel)*	\$ 75.57	\$ 67.11
Fixed-Variable Expense (annual maintenance repairs to system)	<u>41.04</u>	<u>37.95</u>
Total Cash Expenses**	\$116.61	\$106.06
Fixed-Depreciation Expense	<u>56.56</u>	<u>45.25</u>
Total Cash and Fixed Expense	<u>\$173.17</u>	<u>\$150.31</u>

* Reflects higher fuel costs.

** Where applies, there may be an additional cost of \$15.63 per acre for water control in/out of ditches and canals plus \$16.23 per acre for ditch and canal maintenance plus \$17.24 for weed control in ditches and canals.

	PTO-Air Blast Sprayer @ 125 GPA		<u>29.36</u>
Total Spray Program #4 Cost		<u>\$47.88</u>	
#5 (early May)	Copper (Kocide 3000)	2 lbs	\$ 13.59
	Headline EC	12 ozs	<u>34.71</u>
	Total Materials Cost		48.30
	PTO-Air Blast Sprayer @ 125 GPA		<u>29.36</u>
Total Spray Program #5 Cost		<u>\$77.66</u>	
#6 (late May)	Micromite 80 WGS	6.25 ozs	\$ 37.14
	Copper (Kocide 3000)	2.0 lbs	13.59
	Abound EC	14 ozs	<u>27.82</u>
	Total Materials Cost		78.55
	PTO Air Blast Sprayer @ 125 GPA		<u>29.36</u>
Total Spray Program #6 Cost		<u>\$107.91</u>	

Supplemental Table 3. Spray programs used in the Indian River citrus production budgets 2010-2011 (cont'd.)

Program	Analysis/Material Applied	Amount/Acre	Cost/Acre
#7 (early-mid June - Summer Oil)	Copper (Kocide 3000)	2 lbs	\$13.59
	Movento	10 ozs	46.88
	Spray Oil (97+%)	5 gals	29.32
	Adjuvant-Surfactant LI 700	1 pt	<u>2.96</u>
	Total Materials Cost		\$92.75
	PTO-Air Blast Sprayer @ 125 GPA		<u>29.36</u>
	Total Spray Program #7 Cost		<u>\$122.11</u>
#8 (late July)	Evindor 2 SC	15 ozs	\$31.24
	Copper (Kocide 3000)	2 lbs	13.59
	Actara 25 WG	4 ozs	30.79
	Zn (Zinc)	3 lbs	5.94
	Mn (Manganese)	3 lbs	1.91
	B (Borates)	0.25 lb	0.32
	Adjuvant-Surfactant	1 pt	<u>2.96</u>
	Total Materials Cost		86.75
PTO-Air Blast Sprayer @ 125 GPA		<u>29.36</u>	
	Total Spray Program #8 Cost		<u>\$116.11</u>
#9 (September)	Vendex 50W	2 lbs	\$39.90
	Copper (Kocide 3000)	2 lbs	<u>13.59</u>
	Total Materials Cost		53.49
	PTO-Air Blast Sprayer @ 125 GPA		<u>29.36</u>
	Total Spray Program #9 Cost		<u>\$82.85</u>
#10 (late October or November)	Mustang	4.3 ozs	\$ 4.93
	Aerial LV Fix Wing (+/- 5 GPA)		<u>5.39</u>
	Total Spray Program #10 Cost		<u>\$10.32</u>
#11 (late September or October)	Danitol	1 pt	\$21.43
	Vendex 50W	2 lbs	<u>39.90</u>
	Total Materials Cost		61.33
	Fixed Wing Spraying @ 10 GPA		<u>7.42</u>
	Total Spray Program #11 Cost		<u>\$68.75</u>
#12 (late September or October)	Malathion 5 EC	2 pts	\$ 8.77
	Vendex 50W	2 lbs	<u>39.90</u>
	Total Materials Cost		48.67
	Fixed Wing Spraying @ 10 GPA		<u>7.42</u>
	Total Spray Program #12 Cost		<u>\$56.09</u>

Supplemental Table 3. Spray programs used in the Indian River citrus production budgets 2010-2011 (cont'd.)

Program	Analysis/Material Applied	Amount/Acre	Cost/Acre
#13 (mid-October or November)	Imidan 70W	1 lb	\$10.79
	Adjuvant-Surfactant LI 700	1 pt	<u>2.96</u>
	Total Materials Cost		13.75
	Aerial LV Fix Wing (+/- 5 GPA)		<u>5.39</u>
	Total Spray Program #13 Cost		<u>\$19.14</u>
#14 (February and/or November)	Danitol	1 pt	\$21.43
	Aerial LV Fix Wing (+/- 5 GPA)		<u>5.39</u>
	Total Spray Program #14 Cost		<u>\$26.82</u>
#15 (February and/or November)	Malathion 5 EC	2 pts	\$ 8.77
	Aerial LV Fix Wing @ 5 GPA		<u>7.42</u>
	Total Spray Program #15 Cost		<u>\$16.19</u>
